- National Advocacy Center
- Atlanta Bar Association
- Emory University Law School
- American University Law School
- Montgomery College
- Temple University Law School
- Advanced E-Discovery Institute
- Georgia State Bar Association
- Association of Legal Administrators

Bobby has supported litigation and law enforcement professionals as a consultant, technologist, and expert since 2001. Utilizing his unique skills and knowledge of the entire EDRM lifecycle, Bobby has played an integral role in a wide variety of digital forensics matters, making him an indispensable asset to his clients.

Bobby is known for his enthusiastic and interactive approach to public speaking – transforming industry-specific, technical information into knowledge everyone can understand. As a creative and strategic-brained anomaly, Bobby integrates storytelling into his otherwise technical presentations, allowing him to form connections with everyone in his audience.

SPEAKING TOPICS

- **Is it Fake: A Framework for Validating Evidence and Finding Fakes** – Though cake is a pleasant surprise, finding manipulated digital evidence may have a surprising impact on a case. In this session, we slice through the red flags to help you spot potential fake evidence.
- **AI in the Real World: A Lawyer's Toolkit** – All Generative AI are not created equal. And emerging tech has more in common with traditional tech than we realize. In this session, we discuss how to ethically and responsibly use these powerful tools with a familiar approach.
- **Tech Ready: Building Your Approach to Data and Tech** – One does not need to be a tech expert to be technologically competent. Solutions can be found with a shift in perspective, a better approach, and some practical adjustments.
- **Data in Hiding: Understanding, Collecting, and Analyzing Metadata** – What and where is metadata? This session helps attendees define metadata, identify types and locations, and explore the potential impacts of collections and data handling.
- **Electronic Evidence Essential: ESI FUNDamentals** – In this session, we focus on the entire EDRM, empowering attendees to ask the right questions about data to take control of it (instead of avoiding it).
- **Data Science in Litigation** – This session highlights how the tools and skill sets in data science have proven to be effective in eDiscovery, investigations, and litigation.

Available for in-person and virtual presentations

With over 20 years of experience, Bobby has provided consultation for litigation, investigations, cybersecurity, and strategies for expert testimony for legal teams throughout the country. He now directs and executes the collection, development, deployment, and administration of data systems.
